🔗 <https://github.com/Shashini-Siriwardhana>

Electrical and Electronic Engineering graduate with 2.5+ years of combined experience in software development and software product support engineering. Skilled in application development, technical troubleshooting, root cause analysis, and customer-focused issue resolution, with a strong foundation in telecommunications systems and modern software technologies. Eager to apply technical expertise to deliver effective technology solutions while continuing to grow within a dynamic organization.

EDUCATION

MSc in Advanced Software Engineering (Reading)

(January 2026 – Present)

University of Westminster UK

BSc Engineering (Hons) Electrical and Electronic Engineering

(November 2017 – March 2023)

University of Peradeniya

SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, C#, .NET, MATLAB
- **Cloud & Databases:** MySQL, Firebase, Kubernetes
- **Web & Mobile Development:** React, Flutter, HTML, CSS
- **Support & Project Management Tools:** ServiceNow, Jira
- **DevOps & Version Control:** GitHub, Bitbucket, Docker
- **Monitoring & Analysis Tools:** Grafana, Elasticsearch
- **Design & Engineering Tools:** Figma, AutoCAD, KiCad, Postman, Confluence

WORK EXPERIENCE

Sitecore

(19/05/2025 - Present)

Software Engineer

- Provided technical product support for SitecoreAI, assisting customers with product implementation, troubleshooting, and issue resolution.
- Managed and resolved customer support cases through ServiceNow, ensuring timely responses and high customer satisfaction.
- Collaborated with Sitecore Certified Developers, customers, and global technical teams through written communication and technical discussions to resolve complex implementation issues.
- Performed reverse engineering and root cause analysis (RCA) to investigate complex technical problems in customer environments.
- Reviewed and analyzed customer application code written in Next.js and C# to identify defects and recommend solutions.
- Analyzed application and infrastructure logs using Grafana, Kibana, and Elasticsearch to diagnose performance and operational issues.
- Developed code samples, patches, and workarounds to help customers and partners overcome implementation challenges.
- Worked with Docker to deploy, run, and troubleshoot containerized applications in development and support environments.
- Collaborated with engineering and product teams to report, escalate, and track product defects, while contributing enhancement suggestions to improve product quality.
- Documented technical investigations, root cause analyses, troubleshooting procedures, and resolutions to improve internal knowledge sharing and support processes.

Future Labs Pvt Ltd

(02/05/2023 - 31/12/2024)

Software Engineer

- Developed a Python script to stream RTSP video feeds from Raspberry Pi cameras for real-time processing.
- Built a web scraping automation tool using Python and Selenium WebDriver.
- In charge of and managed the question database of the PTE Pro web app.
- Led and fully developed an automated question uploading system using Python, incorporating grammar and spelling checks, audio file processing, and file uploads to Firebase, optimizing content management.
- Created Python scripts for Firebase data management and performance reporting.
- Developed a web application using React.
- Developed a mobile application using Flutter.
- Implemented a student attendance checking tool using Google Apps Script.

VeroxLabs Pvt Ltd

(01/08/2022 - 07/10/2022)

R&D Engineer (Internship)

- Developed an application to verify the connections of the membrane keypad and to get a detailed report using Python.
- Designed a circuit to power a device using both USB and battery power to extend battery life (Solution to the existing circuit of the TMP1000 thermometer).

Sri Lanka Telecom PLC (Headquarters)

(25/11/2019 - 31/01/2020)

Trainee Engineer

- Supported SLT FTTH projects by assisting with testing, quality assurance, and technical troubleshooting.
- Performed system quality checks using ISDP and EPMS applications and collaborated with customers and vendors on technical requirements.

PROJECTS

• Train Ticket Reservation & Management System

Developed a microservices-based Train Ticket Booking System using ASP.NET Core and deployed it to Azure using App Service and Azure SQL Database. [Backend GitHub](#) [Frontend GitHub](#)

Skills:

- ASP.NET Core MVC | C# | Entity Framework Core | REST APIs | Microservices | Azure App Service | Azure SQL Database | HTML/CSS

• EEG based Brain-Computer-Interface

Developed a SSVEP based BCI using Machine Learning and Neural Networks to control a robot arm. A desktop Application was designed using MATLAB app designer for better user experience.

Skills:

- Machine Learning | ANN | MATLAB | Teamwork

Nominee for the W. P. Jayasekara Prize for year 2021/22, which is for the Best Final year Undergraduate Project in the department of Electrical and Electronic Engineering.

OTHER QUALIFICATIONS

- SitecoreAI CMS for Developers Certification (In progress)
- Assistant secretary of IAS University of Peradeniya. (2020-2021)
- Committee member of EEES University of Peradeniya. (2020-2021)
- Associate Member of IESL. (AM-30990)
- Sports: Taekwondo, Chess.
